CARRIER OBJECTIVE

Seeking for a Junior Front-End Engineer position in a fast-growing organization to utilize expertise in web development. Coming with well-honed skills in information technology in addition to excellent communication skills.

SKILLS

- **Expertise:** C++, JavaScript (ES6), HTML5, CSS3, Bootstrap, Tailwind CSS, React.js, React Query, React Router, React Hook Forms, React Firebase Hooks, JSON Web Token.
- **Comfortable:** Python, Java, Node.js, Express.js, MongoDB, My SQL.
- **Familiar:** Data Structure and Algorithm, Problem Solving, TypeScript.
- **Tools:** Firebase, Netlify, Heroku, Git, Vs Code, Chrome Dev Tool, Figma, Photoshop.

PROJECTS

■ Bike-Bones (Full Stack) — [Client-Side](#) | [Server-Side](#) | [Live-Site](#)

Features:

- This application contains payment gateway system. Stripe technology is used to accept payments online.
- It has dashboard route for both customer and admin. An admin has access to add or delete products, remove user and make a user to another admin.
- Customer can add products to cart and also able to remove product from cart before pay.

Technology Used:

Stripe, Node.js, Express.js, MongoDB, React.js, React Query, React Hook Form, React Router, React Spinners, React Toastify, JSON Web Token, React Firebase Hooks, Tailwind CSS, Firebase, Heroku.

■ Rock Electronics (Full Stack) — [Client-Side](#) | [Server-Side](#) | [Live-Site](#)

Features:

- This site has user authentication system. Email-password and social login methods are used. User can't be able to access private route without login.
- A registered user can deliver products in stock page. After deliver the items the total quantity will be decreased.
- User can add items to MongoDB from client side and this item will show in all inventory route.

Technology Used:

Node.js, Express.js, MongoDB, React.js, React Hook Form, React Router, React Toastify, React Firebase Hooks, Bootstrap, Firebase, Heroku.

■ Xplore Wild (Front-End) — [Client-Side](#) | [Live-Site](#)

Features:

- Firebase is used to implement multi-functional login system such as email-password, Google and GitHub.
- If any customer wants to buy or watch more exclusive wild photos, he/she faces private route which can be passed away by registration.
- Moreover, user can update their password through email and in the time of sending email a testify message will be shown in webpage.

Technology Used:

React.js, React Router, React Firebase Hooks, React-Bootstrap, JSON, Firebase

EDUCATIONAL QUALIFICATION

BSc in Information and Communication Engineering

Bangladesh University of Professionals (BUP) | 2018-2021

CGPA: 3.25 Out of 4.00

THESIS

Title: Real Time Bangla Number Plate Detection and Recognition

- Method Used: Machine Learning, YOLOv5, Pandas, OpenCV
- Contribution: New approach based on YOLO model has been proposed and implemented for detecting Bangla number plate from videos.

LANGUAGE

Bangla: Native **English:** Fluent
